The special bond between humans and animals can only be described as unconditional love. It is truly a trying time when the bond is broken by the passing of a devoted pet. Cremation is a way of paying a final tribute to your beloved pet - a voluntary act of love.

## About Us

Pet Memories staff members have been taking care of our community pets since 2005. We offer a modern facility with state of the art equipment to meet the needs of our clients.

## Our Commitment to Service

- Consistently provide prompt, dependable and ethical services
- Work with veterinarians and individuals to provide care for pets and pet owners after the death occurs
- Handle the pet with the same dignity and respect as when dealing with any other family member

## Our Scope of Services

Pet Memories Cremation Service was developed to operate as a professional service for pet owners, for the private cremation of their pets. While we specialize in private individual cremation, we also provide a convenient support service for the communal cremation of deceased pets whose owners do not wish to keep the cremated remains.

### OUR SERVICES INCLUDE:

- Prompt on-call removal of pets from homes and veterinary facilities
- After hours services for additional cost
- Same day cremations available
- Private facilities available for viewing
- Decorative Urns
- Keepsakes

We believe that any business has a responsibility to serve its community. Pet Memories Cremation Service provides private cremations without charge for service dogs such as seeing eye, search and rescue, State Trooper and local police dogs.

## Viewing

Our facility is available to the family for viewing or for a small formal service. Here, a moment of peace and solitude may be shared with your pet. These options are provided by appointment only.

## Private Cremation

This service provides the pet privacy in the cremation chamber and provides the owner peace of mind that the pet has received the highest amount of individual care. Afterward, the pet's cremated remains are carefully packaged for the owner. You can be assured the remains are those of your pet.

Cremation will be completed within one to three working days. A large selection of decorative urns are also available for purchase at [www.petmemoriescremation.com](http://www.petmemoriescremation.com).

Note: Clients who choose private cremation have the option of bringing their pet to our facility. By appointment, the pet owner may also view the cremation process.

## Communal Cremation

This service is for those individuals who do not wish to retain the cremated remains of their pet, but still wish to receive the highest quality of care for their pet.
